ESD

What it's about

- Lesion recognition, delineation/markings
- Knife selection and power unit settings
- Approach to lesion and position changes
- Submucosal injection and dissection
- Complication management (bleeding, perforation)

You should have experience with

- Indications for ESD in the GI tract
- Endoscopic polypectomy and mucosectomy techniques

ESD - Endoscopic hand suturing

What it's about

- Safe needle transfer from esophagus to stomach
- Assessing defects for closure suitability
- Optimal endoscope positioning for suturing
- Handling and manipulating needles with suturing device, using various suturing patterns
- Accurate defect edge approximation for complete closure

You should have experience with

- Understanding ESD defect closure indications, including different defect types
- Knowledge of alternative closure methods
- Proficiency in advanced endoscopic maneuvers
- Familiarity with various suture types and patterns
